TING TECK CHUAN

Software Developer

+60 108658228 | tingteckchuan@gmail.com

PROFESSIONAL SUMMARY

Software Developer with 5+ years of experience, specializing in backend development using **Java** and **Spring Boot**. Delivered end-to-end solutions for the banking industry and government property management systems (PRISM) Proficient in **API development**, **PostgreSQL**, and performance optimization using tools like Spring Batch and asynchronous methods.

Experienced in designing project workflows, understanding business requirements, and collaborating with business analysts. Skilled in solving complex problems, mentoring teammates, and conducting research for effective solutions.

Self-taught in mobile development with **Flutter**, having built a to-do app and deployed applications using **Spring WebSocket** on Render. A **detail-oriented team player**, fluent in **English**, **Malay**, and conversational **Chinese**.

EDUCATION

Bachelor's Degree in Computer Science/Information Technology, Monash University
Diploma in Mathematical Science (Major in Advance Computer Science)

SKILLS

- SQL
- PYTHON
- JAVA
- FLUTTER
- SOFTWARE TROUBLESHOOTING
- SOFTWARE LOGICS
- SPRING
- VERSION CONTROL (GIT)
- JMETER

WORK HISTORY

FARBEN (Support Engineer L2 Position) | Dec 2025 – Present

- Mainly handle production issues by filtering first on server level from resource bottleneck, application logs, then database level for clearer understanding on certain scenarios.
- Handle weekly deployment and ensure services under me are live and healthy. After deployment, application log checking, business verification to ensure system is up and ready.
- Frequent contact with developers and requesters to better understand and debug issues. (I do not have source code access

PYMSOFT SDN BHD | Oct 2023 – Dec 2025

- Involved in a project where I had the opportunity to come up with code skeleton structure adhering to necessary project's logics.
- Understand and solve performance issues, ranging from slowness occurring even with pagination, difference between using Spring JPA's entity/ native query, performance impact of eager/lazy loading in regards to using Spring, optimizing codes to avoid N+1 query issues and unnecessary code complexities. Opportunity to research and play around with async methods and how it impacts the performance and cpu usage.
- Also had the opportunity to go on-site, to understand more about project's requirements and how discussions for the project underwent. Not only that later during the completion of project's module, had the opportunity to participate in on-site support for any bugs and issues.
- Also involved in stress-testing using Jmeter and understanding how to monitor performance using Java Melody.

Application Engineer, Hitachi Ebworx Sdn Bhd | Sep 2022 – Sep 2023

- Back End development using spring and postgres for db.
- Implementing unit tests, fixing code smells, etc (Junit, Jacoco to view locally, Sonarqube for actual env)
- Occasional bug fixing tasks.
- Involved in the completion of a project from start to end where during this period I managed to learn and understand more about spring batch. More importantly, I had a better opportunity to understand performance impact on large query transactions and how to better optimize them.

Software Engineer, AYP HR Group Sdn Bhd | Feb 2021 — Aug 2022

- Involved in the development of web application via Laravel. Frontend development done using javascript and backend using Php.
- Understanding code review and how to do code review according to company standards
- Presenting solution to task before the sprint begins

Freelance Projects, Fiverr | 2021

- Job mostly done in Python and Java. Related to minor assignments of other students/ companies
- Understanding software development in relation to client's ever-changing requirements

Intern Developer, B2BE GSS Sdn Bhd | Dec 2019 — Feb 2020

- Worked on business transaction documents (Simple implementation in C programming and manual testing of developed code)
- Front end web portal development accurately based on the given designs and functionalities provided via Vue
